

bulthaup projects

Competence that builds trust

A cooperation with bulthaup stands for added value in the project business

As an independent family-owned company, we always think and act responsibly and for the long term. We remain committed to our company headquarters and only production site in Germany, while relying on a worldwide network of long-standing and carefully selected bulthaup partners at the same time. Together with our partners, we remain true to values such as trust, quality, and reliability and ensure that the requirements of demanding projects are met.

Whether a single room or a large project – each kitchen is planned based on the respective requirements and individually manufactured with the passion that is characteristic for us. Worldwide, the bulthaup brand is known for its premium kitchens of the highest quality and, as a result, contributes to the differentiation as well as increasing the value of properties in the high-price segment.

Marc O. Eckert
CEO, bulthaup

bulthaup

Global identity of the bulthaup brand

bulthaup is synonymous with kitchen and room systems in the premium segment

bulthaup

Passion for the right things

Being premium means taking responsibility – responsibility toward our values and your demand for an outstanding overall project.

Quality

Our quality management goes far beyond international standards. In our production, modern industrial manufacturing combined with traditional craftsmanship results in the highest processing quality.

Material authenticity

We use authentic materials and carefully select them from trusted suppliers. Using the material in a place where it makes sense preserves its authenticity.

Stable value

Our products stand for timelessness and they function with the same precision as they did on the first day after decades of use. This way, we create durable products of lasting value.

bulthaup

Internationally pioneering design quality

bulthaup designs kitchen spaces based on people's needs and habits as well as on the architecture of your project.

Form

We have a simple design language that is understood all over the world. We do not presume to dominate the architecture, but rather complement it. This results in kitchens that are timeless and prioritize their users.

Function

We have developed the bulthaup system in accordance with ergonomic requirements so that people feel comfortable in their kitchens. The functions are logically and meticulously arranged and also thought out down to the smallest detail.

Material

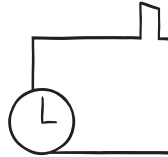

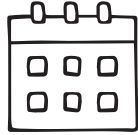

The clear forms ensure that the effect of the materials can unfold. Users can experience the authentic and perfectly finished materials with both their eyes and hands.

bulthaup

bulthaup project competence

Specific support through all phases of a project

bulthaup

Project marketing and bulthaup brand experience for your customers in exclusive showrooms around the world.

Conception of the ideal solution for your project in terms of architecture, costs, and culture.

Coordinating schedules and reserving the appropriate manufacturing capacities.

Producing large amounts in short time frames at consistently high standards of quality.

Continuous and reliable process chain from the manufacturer to the construction site.

Assembly and construction site management by qualified local partners.

Long-term contact person and local service, also for end customers.

bulthaup

Efficient bulthaup project management

Service and efficient management make the difference, especially when it comes to complex projects. At bulthaup, you profit from the combination of local and global expertise.

With bulthaup contacts on-site and experts in the background, we guarantee a comprehensive service. In addition, a competitive price is generated through the targeted use of the respective competencies and resources.

Local competence

Our bulthaup partners personally support you at all times. They have an understanding for the country, the local culture and people. At the same time, they work in line with the bulthaup philosophy.

Global competence

Our project team in Germany centrally manages all international projects. In close cooperation with the research and development department as well as production, this team manages your project at the company's headquarters, contributing its many years of expertise.

References

Our extensive experience is documented in a multitude of outstanding references all over the world. We carry out projects ranging from five to over 500 kitchens with the most diverse types of construction and usage.

28 Aberdeen Street, a 23-story residential building, is located in the historic center of Hong Kong. The apartments, which boast an unspoiled view of the city, are a prime example of efficient use of space.

In terms of both color and material, the bulthaup b3 blends seamlessly into the architecture. The contrast between sand beige aluminum and black/brown oak intensifies the vibrancy of the spatial concept. With its slim, graceful fronts, the bulthaup b3 is tailored to the functional and volume intensity of the kitchen area.

At Casa Burés – an art nouveau gem that has been honored many times for its interior design – the values of modernism were reinterpreted during renovation. In the unique apartments, the bulthaup b3 allows the architecture to take the lead by adopting a freestanding position away from the walls.

The kitchen's color scheme supports the hues of the original interior elements – without competing with them. In design terms, the graceful bulthaup b3 takes a subtle step back while still offering a platform for human interaction.

The architects integrated the materials and building style of the region and created a sophisticated and well-thought-out living concept.

Ideally suited to this, the bulthaup kitchen planning is in perfect harmony with the room in terms of size, arrangement, and choice of materials. Starting from a central axis, the water and cooking points, functional elements and even the oak veneer of the kitchen island are absolutely symmetrical. The roof light in the center brings additional brightness and, together with the floor-to-ceiling bulthaup b3 creates a striking effect.

bulthaup
